EXPERIENCE

Paycom

Irving, TX

Software Development Engineer

May 2024 – Present

- Designed and optimized **RESTful APIs** using **Node.js** and **.NET Core**, streamlining automated tax reporting workflows and reducing response latency by **50%** for **2,000+** payroll specialists.
- Led front-end modernization with **React.js** and **TypeScript**, enhancing component reusability and cutting load times by **35%** while architecting containerized **microservices** on **AWS** achieving **99.9%** uptime.
- Implemented **Docker-based CI/CD** pipelines that standardized development environments, cut deployment times by **30%**, and optimized **PostgreSQL** queries to boost throughput for high-volume tax computation workloads.
- Tech stack:** Node.js, .NET Core, React.js, TypeScript, PostgreSQL, AWS, Docker

Paycom

Irving, TX

Software Developer Intern

May 2023 – August 2023

- Developed a **full-stack CRM** web application using **React**, **TypeScript**, **Node.js**, and **PostgreSQL**, enabling automated client data synchronization and reducing manual data entry by **50%** across sales teams.
- Built modular and reusable **React** components and **RESTful APIs** to standardize UI patterns across CRM workflows, improving developer productivity by **20%**.
- Tech stack:** React.js, TypeScript, Node.js, Express.js, PostgreSQL

TECHNICAL SKILLS

Programming Languages: JavaScript/TypeScript, Python, C#

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, .NET Core, Flask, Zustand, Context API

Agentic AI: Google ADK, MCP, LiteLLM

Others: AWS (CDK, Lambda, API Gateway, S3, Cognito, CloudFront, DynamoDB), Docker, PostgreSQL, MongoDB, MySQL

PROJECTS

Building Agents with Google ADK | [Code](#) | [Blog](#)

- Built a custom **MCP** server wrapping **Google ADK** FunctionTools, enabling tool reuse across any MCP-compatible AI framework without rewriting tool logic.
- Integrated **Claude Sonnet 4.6** into a Google ADK agent via **LiteLLM**, decoupling the LLM choice from the agent architecture and enabling model swapping at the configuration level.
- Implemented **stdio MCP transport** with runtime tool discovery — the agent enumerates available tools dynamically via MCP rather than hardcoded bindings.
- Tech stack:** Python, Google ADK, MCP, Claude Sonnet 4.6, LiteLLM

Space Finder | [Code](#) | [Live Demo](#) | [Blog](#)

- Built a **serverless** full-stack app on **AWS** with **infrastructure-as-code** across six **CDK** stacks, featuring direct browser-to-**S3** uploads via **Cognito** federated credentials and per-user data isolation at the **DynamoDB** query level.
- Deployed the **React** SPA via **CloudFront** with automated cache invalidation on each release; implemented **CloudWatch** and **SNS** monitoring for real-time API error alerting.
- Tech stack:** AWS CDK, TypeScript, React 19, API Gateway, Lambda, DynamoDB, S3, Cognito, CloudFront, SES

ACHIEVEMENTS

Winner, HackUTD X | *CBRE Track, Biggest Hackathon in Texas* | [Devpost](#)

Nov. 2023

Dean's Excellence Scholarship | *Top 1% of class, UT Dallas*

2022

EDUCATION

The University of Texas at Dallas

Dallas, TX

Master of Science in Computer Science | GPA: 3.93/4.0

2022 – 2024

BITS Pilani, Pilani Campus

Pilani, India

B.E. in Chemical Engineering & M.S. in Economics (Dual Degree) | GPA: 7.7/10

2015 – 2020
